

Foreign Actor vs Indian Actor  
and the story of duplicate data in India  
Rajat Kalia  
18 October, 2020

I am Rajat Kalia's Foreign Actor . I encountered a specific problem while i was in india and that was that while i was named rajat kalia there as well but youtube/google etc all web resources were showing another person with that name but with same/similar videos all over.

So it is possible that in india there are virtual resources allocated to actors by creating duplicate data, further it's a way of living there while all in foreign have to work i think. I think all this fake data has been created for rest purpose as those people don't want to work.

In my case another person shimla puri superman was rajat kalia's indian actor while even i was living in india as rajat kalia.

Here my name is Xpinder Narula and i have got some videos for myself. While in india there is another person aarav sood who is by some means xpinder narula's indian actor on the web. He has also shown similar videos in youtube etc.

It's known that it was india's kairav kalia who had put all the fake data on web. Rajat Kalia told me that he has tons of it(fake data).

Evidently no permission has been taken from the foreign actor while creating the indian actor profile on india's youtube etc websites while here the data is correct. Kaur B/Anupam Kher even came one day to put jack on my sher's internet connection to provide support to run his youtube in india. She has even registered an SC Certificate(Scheduled Caste).
